Product highlights

Print-like display quality
Digital Photo Display shows 88 percent more pixels per square inch than a 17-inch monitor. This high pixel density displays your treasured photos with all the rich detail and vibrant colors you're accustomed to in printed photos.

Memory card slot
A built-in multi-slot memory card reader for easy viewing and sharing of stored photos. One memory card slot accepts Compact Flash I (CF) cards while the second accommodates Memory Stick (MS), SD Card and Multi Media Cards (MMC).

Intelligent photo storage
Intelligent photo storage employs smart software that minimizes required storage space without compromising photo display quality.

Adjustable brightness
Adjustable display brightness delivers a better viewing experience by giving you the ability to match display brightness to ambient lighting conditions regardless of whether you're viewing treasured photos in daylight or at night.

USB port
A USB connector built into the device, for easy and quick reading or downloading photos from most cameras or PCs. Please visit Philips web site to check your camera's compatibility with Philips Digital Photo Display.

Multiple viewing modes
Flexible display modes give you the freedom to display your photos one image at one time, in thumbnail mode for quick, easy searches, or to create a slideshow of your most treasured photos.
